WORK EXPERIENCE

Front- End-WebDevlop

As a front-end developer, my primary focus is on the visual and interactive elements of a website or application that users will see and interact with. This involves creating the user interface, designing and styling the layout, and ensuring that the site or app is responsive and easy to use on different devices. I typically work with a variety of programming languages, such as HTML, CSS, and JavaScript, as well as frameworks and libraries like React I use these tools to create web pages and applications that are functional, fast, and visually appealing. To Know more About me have given all the links of my projects in my portfolio website or i have also mentioned the links or my project in the Personal Project Section. All the projects are hosted on the netlify website live .

SKILLS

Hypertext Markup Language(HTML)

Cascading Style Sheets
